21 Finsbury Square 17th Oct. 1831

My Dear Sir

I sent you by Friday's
Post one of your printed notices about the
Sugar pan, with a request that you
would put the drawing into the hands
of an engineer who would give an
estimate of its cost — I now send you
an advertisement in the opposite leaf
which you are requested to insert once
in the Courier & Herald Chronicle if you
like also — We wish you to receive
the Applications, and my son Andrew
could afterwards take charge of sending me
the Inclosures of them — I have written
also to Dr. Anderson of Edinr. to receive
the applications there — You had better
advertise also in the Edinr. Leith & Glasgow
Advertising Paper if you think fit, or in

the most generally circulated Edinburgh Paper -

Excuse this trouble and Believe me

to be My Dear Sir

Yours truly

Andrew Moe

P. S. Read the inclosed — Put a wafer

into it and send it off by the Edinr Post

scientific an aspect; though
it was in reality very simple.
It is a pity that a little
more Chemistry is not impar-
ted to English Gentlemen
than what they get at the
Universities - I regret that
I have not leisure at present
to enter into the details
of the construction of my
ammonia meter, nor do
I know of any workman
who would make it to my
mind. I construct these
instruments of minute analysis
which require exact gradua-
tion & always into my
own hands, to suit the
assistance of my sons.

I have the pleasure of
requesting your acceptance
of a paper on the potato disease
I think the persons employed
upon this matter by the
Government made a botch
of it, both theoretically &
practically - Were I to
make such oversights in
analysis as Chemist to
H. M. Customs, I should have
been dismissed from the
service many years ago -

I remain

Sir

Your very faithful

Servant

Andrew Ure

Revd. William Ramsden

ANDREW URE

London 13 Charlotte Street

Bedford Square 10th Jan.y 1846

Sir

In reply to your favour
of the 7th curt. I beg to
apprize you that when I
gave in my paper on the
analysis of Guano to the
Council of the R. S. of Agric.
I accompanied it with a
paper on Alkali-metry, in
which the principles of my
ammonia meter were explain-
ded - The Agr. Society did
not think fit to publish
any part of that Essay, prob-
ably because it had too

London 24 Blooms bury Square
24 January 1851

Sir

Being now busily oc=
cupied at all the leisure
intervals of my ordinary
professional engagements
in composing my New
Dictionary of General
& Analytical Chemestry,
in which Germs will be
treated, I do not mean to
publish separately any
pamphlet — I am Sir Yours &c
Mr. T. West — Andrew Ure

Mr Theodore West
Albion Street

Dear Sir

Your kind and attentive letter gave me much pleasure particularly as it informed me of your good health and that of your family. ——

Besides the Great Astronomical circle which was the soul of Mr. Greville's observatory, we have also got from the Colonel his brother an excellent clock & Barometer the former furnished with a new scapement by Hardy the latter by Troughton - I dont believe that there was any thing else of consequence except a transit circle bought at second hand, the nature and value of which I am not acquainted with — Firminger whom Mr. G. had employed as the superintendent of his Institution, has come to London in quest of employment; and had hopes of being appointed Clerk to the R. Society a situation vacant by the death of Mr. Gilpin, had it not been for the hostility of Dr. Maskelyne by whose opposition I fear Firminger will be disappointed —— Besides the rooms in

our public building (now erecting) for the purposes
of Observation, we have attached to it two houses
one for the Observer, the other for a Keeper: the
latter will probably be a gardener as we shall
convert, the ground surrounding the Observatory, into
a Botanic garden. — Mrs Ure is proud
to be so kindly remembered by you, & begs to
join me in compts. to Mrs Allen —

Believe me Dear Sir

to be ever Your obt. faithful Servt.

And.w Ure

Glasgow 22d Augt. 1810

with much satisfaction
P.S. Our Directors perceived the judicious abridgement
of the notice of Herschel's visit, which you
inserted in your paper. — All.

URE, ANDREW (1778-1857) Chemist.

A.L.S. to an unnamed correspondent.

1p. 4to. Finsbury Square: 17 Oct. 1831.
Saying that he had sent him the notices about the sugar pan, & asking him to get an estimate from an engineer as to its cost. He sends an advertisement which is to be inserted in the Edinburgh papers & asks that Dr. Anderson should receive the applications.

FLETCHER- 58

——————— Another to Theodore West.

1p. 8vo. London: January 24th. 1851.
Saying that he would not publish a pamphlet separately, as he was engaged "in composing my New Dictionary of General & Analytical Chemistry". He was educated at Edinburgh & Glasgow Universities.
